TRELLIX

Application and Change Control Essentials - Bundle
Self-Paced Online Training

✦ Highlights

Duration

4 hours

Prerequisites

Students taking this course should have a working knowledge of Windows operating systems, system administration, and network technologies. Basic understanding of computer security, command line syntax, malware/anti-malware, virus/anti-virus, and web technologies is recommended. Prior experience or working knowledge of ePolicy Orchestrator is also required.

How to Register

This course is available for purchase at https://trellix-training.netexam.com.

Introduction

This course bundle provides an in-depth introduction to the tasks required to install, deploy, and manage Trellix Application and Change Control (TACC). Application and Change Control is made up of three components; Application Control, Change Control, and Integrity Monitor. Application Control uses dynamic allowlisting to make sure that only trusted applications run on devices, servers, and desktops. Change Control allows you to monitor and prevent changes to the file system, registry, and user accounts. Integrity Monitor provides real-time monitoring and identifies transient change violations. This course bundle is designed as a practical starting point for someone who is new to supporting TACC.

Learning Objectives

After completing this course, learners should be able to:

- Describe the Application and Change Control solution and components.

- Plan an Application and Change Control deployment.

- Install and deploy Application and Change Control.

- Configure Application Control rule groups, Change Control rule groups, and Integrity Monitoring rule groups.

- Configure Application Control policies on ePolicy Orchestrator.

- Design the Application Control Trust Model.

- Use Application Control Inventory mode.

- Enable and Configure Change Control.

- Configure Integrity Monitoring policies.

- Use the Application and Change Control dashboards and reports.

- Perform basic system troubleshooting tasks.

- Use the Application and Change Control Command Line Interfaces to perform system tasks.

- Use recommended best practices with Application and Change Control.

Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with system endpoint security.

Course Outline

1. **Introduction**
   - Course Introduction
   - Application and Change Control Overview
   - Course Summary
   - Course Exam

2. **Deployment**
   - Course Introduction
   - Planning an Application and Change Control deployment
   - Install and Deploy Application and Change Control
   - Course Summary
   - Course Exam

3. **Configuration**
   - Course Introduction
   - Application and Change Control Rules and Rule Groups
   - Application and Change Control Policies
   - Trust Model and Protected Files
   - Application Control Inventory
   - Change Control
   - Integrity Monitoring
   - Course Summary
   - Course Exam

4. **Management**
   - Course Introduction
   - Dashboards and Reporting
   - Troubleshooting
   - CLI Administration and Recommended Practices
   - Course Summary
   - Course Exam
