

Endpoint Security (HX) Essentials:Introduction

Self-Paced Online Training

Highlights

Duration

1 Hour

Prerequisites

Students taking this course should have a working knowledge of Windows operating systems, system administration, and network technologies. Basic understanding of computer security, command line syntax, malware/antimalware, virus/anti-virus, and web technologies is recommended.

How to Register

This course is available for purchase at https://training-catalog.trellix.com.

Introduction

This course provides an introduction to Trellix Endpoint Security (HX). Trellix Endpoint Security (HX) performs fast, targeted forensic investigations across thousands of endpoints. It prevents cyber-attacks on the endpoint, detects malware and other signs of compromise, and allows customers to respond to endpoint security incidents faster.

Learning Objectives

After completing this course, learners should be able to:

- Describe the Endpoint Security (HX) solution.
- Plan a product deployment in your customer's environment.

Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with system endpoint security.

Course Outline

1. Course Introduction

3. Planning a Deployment

2. Product Overview

4. Conclusion
