File and Removable Media Protection Essentials - Introduction
Self-Paced Online Training

Highlights

Duration

1 hour

Prerequisites

Students taking this course should have a working knowledge of Windows and macOS, along with familiarity with system administration and network technologies.

Recommended prerequisites include a basic understanding of computer security, data encryption principles, and command line syntax, as well as knowledge of malware, antimalware, viruses, antivirus, and web technologies. Additionally, prior experience or working knowledge of Trellix ePolicy Orchestrator (ePO) and Trellix Agent is also required.

How to Register

This course is available for purchase at https://training-portal.trellix.com/.

The File and Removable Media Protection Essentials - Introduction course serves as a comprehensive introduction to FRP, covering key features, use cases, product components, and high-level interface orientation.

FRP delivers policy-enforced, automatic, and transparent encryption of files and folders stored or shared on PCs, file servers, removable media such as USB drives, CDs/DVDs, and ISO files, cloud storage services, and emails. This course is designed as a practical starting point for someone who is new to supporting FRP.

Learning Objectives

After completing this course, learners should be able to:

- Describe the key features and capabilities of FRP.
- Describe the product components of FRP and how they work.
- Describe use cases and benefits of FRP.
- Navigate the FRP interface on ePolicy Orchestrator (ePO) console.
- Navigate the FRP Client interface on endpoints.

Who Should Attend

The course is designed for system and network administrators, security personnel, auditors, and consultants who are concerned with data encryption on endpoints.

Enhance your expertise by exploring the fundamentals and key aspects of FRP, especially if you are new to working with or supporting this solution.

Course Outline

1. Introduction
2. FRP Solution Overview
3. Conclusion
