Trellix

Management of Native Encryption - SaaS: Configuration

Self-Paced Online Training

Highlights

Duration

4 hours

Prerequisites

Students taking this course should have a working knowledge of Microsoft Windows administration, system administration concepts, and a basic understanding of computer security and internet services. It is also necessary to have prior experience using Windows CLI commands and ePolicy Orchestrator.

How to Register

This course is available for purchase at https://trellix-training.netexam.com.

Introduction

Throughout this training, you'll develop expertise in managing and configuring BitLocker and FileVault using MNE - SaaS. Additionally, you'll gain a comprehensive understanding of managing various topics, including MNE User Access Management, Master Key Management, setting up an AWS Customer Master Key, Deploying MNE clients using the Company's Master Keys, Configuring and Deploying MNE Using an AWS Customer Master Key, Revoke Customer Master Key, and Managing Policies. Upon completion of this course, you'll be equipped to enhance the security and compliance of your organization's IT infrastructure.

Learning Objectives

After completing this course, learners should be able to:

- Proficiently manage BitLocker and FileVault via MNE - SaaS.

- Apply MNE User Access Management best practices for secure user control.

- Employ effective techniques for Master Key management to enhance data security.

- Set up AWS Customer Master Key for data security in MNE - SaaS.

- Deploy MNE Client with Company's Master Keys for seamless integration and endpoint security.

- Configure MNE using AWS Customer Master Key for optimized security and compliance.

- Understand and execute Customer Master Key revocation for data security.

- Implement Policies Management to enforce security policies and ensure IT compliance.

Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with network and system security.
