

# Native Drive Encryption On-prem Essentials: Configuration

## Self-Paced Online Training

### Highlights

#### Duration

4 hours

#### Prerequisites

Students taking this course should have a working knowledge of Microsoft Windows administration, system administration concepts, and a basic understanding of computer security and internet services. It is also necessary to have prior experience using Windows CLI commands and ePolicy Orchestrator.

#### How to Register

This course is available for purchase at <https://trellix-training.netexam.com>.

Throughout this training, you'll develop expertise in managing and configuring BitLocker & FileVault systems using ePO On-prem, including adding client systems to groups, enabling maintenance mode, configuring product policies, setting up automatic unlock for fixed volumes, registering an LDAP server for preboot user assignments, and provisioning users to use preboot from Windows logon, concluding with a summary of key practices.

### Learning Objectives

After completing this course, learners should be able to:

- Manage and configure BitLocker systems with Trellix.
- Adding client systems to groups
- Enabling maintenance mode
- Configuring product policies
- Setting up automatic unlock for fixed volumes.
- Registering an LDAP server for preboot user assignments

### Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with network and system security.

## Course Outline

1. Introduction
2. Adding client system to an existing group
3. Maintenance mode on BitLocker systems
4. Product policies
5. Automatic unlock of fixed volumes for client systems
6. Register an LDAP server for preboot user assignment
7. Summary
