

# Native Drive Encryption - SaaS Essentials: Introduction

## Self-Paced Online Training

### Highlights

#### Duration

1 Hour

#### Prerequisites

Students taking this course should have a working knowledge of Microsoft Windows administration, system administration concepts, and a basic understanding of computer security and internet services. It is also necessary to have prior experience using Windows CLI commands and ePolicy Orchestrator.

#### How to Register

This course is available for purchase at <https://training-catalog.trellix.com>.

### Introduction

This course provides information on basic features, and introduces the product, highlighting its key features, purpose, and benefits. Additionally, it presents a high-level overview of the functionality of native encryption technology on ePO - SaaS.

### Learning Objectives

After completing this course, learners should be able to:

- Understand the core functions of Trellix® Native Drive Encryption (TNE), including encryption management, and status.
- Evaluate the benefits of adopting Trellix TNE for BitLocker, such as reduced licensing costs and management overhead.
- Implement consistent policy enforcement and compliance across encryption technologies within their organization.
- Utilize comprehensive reports and automated monitoring provided by Trellix TNE to maintain complete visibility of encryption status.

### Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with network and system security.

### Course Outline

1. Introduction
2. Product Overview

3. Key Features and How it Works
