

SOLUTION BRIEF

Revolutionizing Cybersecurity with Trellix, AWS, and Telefónica Tech

A Strategic Partnership Empowering Your Business with Unmatched Cybersecurity

Empower Your Security with Trellix, AWS, and Telefónica Tech

The Trellix, AWS, and Telefónica Tech partnership offers an unmatched security solution tailored to meet the specific needs of your industry. Whether you're looking to safeguard sensitive financial data, protect patient information, or secure your enterprise's global operations, this partnership provides the tools, expertise, and support you need to stay ahead of evolving threats.

A Unified Approach to Cybersecurity

Cyber threats continuously evolve and businesses need more than just reactive security measures—they need a dynamic, proactive approach that adapts to ever-changing threats. The collaboration between **Trellix, AWS, and Telefónica Tech** delivers a comprehensive solution tailored to meet the evolving demands of today's cybersecurity landscape. Together, they provide a comprehensive, integrated security solution that ensures your business is protected across all digital fronts.

This collaboration leverages the combined strengths of Trellix's advanced threat detection and response capabilities, AWS's robust cloud infrastructure, and Telefónica Tech's global expertise in cybersecurity and cloud services. Whether you operate in highly regulated industries such as healthcare, financial services, or any other industry, this partnership is designed to safeguard your operations, data, and reputation.

The Living Security Platform on AWS

At the heart of this partnership is Trellix's **Living Security Platform**, a constantly evolving system that integrates telemetry data, artificial intelligence (AI), machine learning (ML), and automation. This platform goes beyond traditional monitoring by offering robust detection, response, and remediation capabilities. It identifies and neutralizes threats that conventional security measures might miss, ensuring that your business remains resilient against a wide range of cyberattacks—from ransomware to credential harvesting. In addition, Trellix has introduced **Trellix Wise**, a generative AI extension that further enhances these capabilities by automating complex security processes and providing deeper protection against sophisticated threats.

For organizations just beginning their cloud journey, migrating to AWS is seamless with the combined support of Trellix and Telefónica Tech.

Recognitions and Industry Leadership

Telefónica Tech

- Ranks **#2 in MSSP Alert's 2023 Top 250 MSSPs**, demonstrating global leadership in managed security services.
- As an **AWS Advanced Tier Services Partner** with **AWS Security Consulting** and **AWS Certified Security Specialties**, Telefónica Tech delivers secure, scalable cloud solutions across industries alongside AWS and Trellix.

Trellix

- A leader in extended detection and response (XDR), seamlessly integrates with AWS services, including **Amazon Bedrock AI**.
- Awarded multiple **2024 Global InfoSec Awards** from Cyber Defense Magazine and named Frost & Sullivan's **Global Endpoint Security Company of the Year**, Trellix continues to innovate in threat detection and response.

Trellix's tools, such as Trellix **Advanced Threat Protection (ATP)** and **Data Loss Prevention (DLP)**, work in tandem with AWS's comprehensive cloud services to provide layered, comprehensive security. Telefónica Tech adds its decade-long experience as an AWS partner, ensuring a smooth and secure migration process, giving you peace of mind as you transition to the cloud.

Enhancing Business Continuity and Compliance

A move to the cloud can raise concerns about business continuity and regulatory compliance, especially in highly regulated industries like healthcare and financial services. The Trellix, AWS, and Telefónica Tech partnership addresses these concerns head-on:

- **Visibility and Continuous Monitoring** : Trellix's DLP Discover and Cloud Security Platform, integrated with AWS CloudTrail, offer unparalleled visibility into your cloud environment. This integration enables continuous monitoring and advanced threat protection, ensuring that any potential risks are identified and mitigated in real-time.
- **Configuration Management and Compliance** : The combination of Trellix DLP Discover with AWS Identity and Access Management (IAM) simplifies the management of permissions and policy enforcement. Telefónica Tech's deep expertise in global compliance standards ensures that your organization meets all necessary regulations, no matter where you operate. This is crucial for meeting compliance standards such as **GDPR**, **PCI DSS**, and **FINRA**, which are mandatory for industries like healthcare and financial services.
- **Simplified Compliance Through Automation** : Trellix Cloudvisory, built on AWS, automates compliance reporting and policy enforcement, making it easier for your teams to demonstrate protection and meet cyber insurance requirements.

Real-World Applications Across Industries

Financial Services: A leading bank utilizes Trellix's AI-powered XDR platform, integrated with AWS's cloud services, to enhance its threat detection and response capabilities. By leveraging Trellix Wise, the bank automates complex security processes, significantly improving its ability to detect and respond to sophisticated threats in real-time. Telefónica Tech's expertise ensures compliance with global financial regulations while maintaining a secure and resilient cloud environment.

About Trellix

Trellix is a global company redefining the future of cybersecurity. The company's open and native extended detection and response (XDR) platform helps organizations confronted by today's most advanced threats gain confidence in the protection and resilience of their operations. Trellix's security experts, along with an extensive partner ecosystem, accelerate technology innovation through machine learning and automation to empower over 40,000 business and government customers.

Healthcare: A regional healthcare provider implements Trellix's Living Security Platform to protect sensitive patient data during a cloud migration. With AWS's secure infrastructure and Telefónica Tech's support, the provider meets HIPAA compliance and ensures the confidentiality, integrity, and availability of critical health information.

Global Enterprises: A multinational corporation adopts the Trellix, AWS, and Telefónica Tech solution to secure its global operations. By integrating Trellix's endpoint security with AWS services and Telefónica Tech's managed services, the company achieves a holistic security posture that protects against advanced threats while optimizing operational efficiency.
