# 

## Database Security Administration Instructor-Led Training

### Highlights

#### Duration

2-days

#### Prerequisites

Students taking this course should have a working knowledge of Windows operating systems and system administration, basic understanding of database concepts, and a general understanding of internet services.

### How to Register

This course is available for purchase at <u>https://trellix-training.netexam.com</u>.

Private sessions are available. For further details and pricing, please contact your Trellix account representative.

Instructor-led sessions are typically a blend of lecture and hands-on lab activities. To view our full course catalog, please visit <u>https://trellixtraining.netexam.com</u>. This course is an essential component to monitor and protect the Database Management System (DBMS). In hands-on lab sessions, you will learn how to deploy and configure a Trellix Database Security solution to protect the Database Management System from internal and external threats and even intra-database exploits. You can immediately apply your new skills to improve protection for your business and take full advantage of your investment in our Database Security solution.

### **Learning Objectives**

After completing this course, learners should be able to:

- Define Database Security and its intended capabilities
- Identify the products and features of Database Security solution
- Install and set up Database Security solution
- Monitor activities on supported databases
- Scan supported databases for vulnerabilities
- Leverage the various functions of Database Security alerts
- Produce Database Security reports

### Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/ or consultants concerned with system security.

### **Course Outline**

### Day 1

- Welcome
- Databases Overview
- Database Security Concerns
- Product Overview
- Installation
- Advanced Enterprise Configurations
- User Rights and Roles Management

### Day 2

- Monitoring Database Activities
- Alert Features
- Vulnerability Scanning
- Reporting and Dashboard Features
- Integrations and Advanced Analysis
- Maintenance
- Troubleshooting
