

# Intrusion Prevention System Administration

## Instructor-Led Training

### **Highlights**

#### **Duration**

4-days

#### **Prerequisites**

Students taking this course should have a working knowledge of Microsoft Windows administration, system administration concepts, a basic understanding of computer security concepts, and a general understanding of internet services.

#### **How to Register**

This course is available for purchase at <https://trellix-training.netexam.com>.

Private sessions are available. For further details and pricing, please contact your Trellix account representative.

Instructor-led sessions are typically a blend of lecture and hands-on lab activities. To view our full course catalog, please visit <https://trellix-training.netexam.com>.

This course is a key resource for successful implementation of the Trellix Intrusion Prevention strategy for enterprises. The hands-on lab sessions help you learn how to deploy and configure the Intrusion Prevention System as a solution to protect against real-world attacks.

### **Learning Objectives**

After completing this course, learners should be able to:

- Plan the deployment of Intrusion Prevention System (IPS)
- Install and configure the IPS Manager
- Install and configure Sensor(s)
- Create, configure, and manage administrative domains, users and user roles, and IPS policies
- Describe attack types and configure protection against attacks
- Analyze and respond to potential network threats
- Map and configure network appliance(s) (Sensors)
- Manage Firewall Policy configuration
- Perform IPS database maintenance

## Who Should Attend

This course is intended for analysts and/or engineers responsible for configuration, management, and monitoring activity on their systems, networks, databases, and applications.

## Course Outline

### Day 1:

- Welcome
- Introduction to IPS
- Planning IPS Deployment
- Getting Started
- Configuration Manager
- User Management
- Administrative Domains

### Day 2:

- Sensor Overview
- Basic Sensor Management
- Advanced Sensor Management
- Policy Configuration
- Policy Customization
- Virtualization (Sub-interfaces)

### Day 3:

- Threat Explorer
- Attack Log
- DoS Attacks
- Advanced Malware Detection
- Advanced Callback Detection
- Inspection Options Policies

### Day 4:

- Web Server Protection
- Firewall Policy Configuration
- Policy Tuning
- Report Generation
- Operational Status
- Database Maintenance
