# Data Loss Prevention Network Administration
## Instructor-Led Training

## Highlights

### Duration

4-days

### Prerequisites

Students taking this course should have a working knowledge of Windows operating systems, system administration, and network technologies. Basic understanding of computer security, web technologies, and data loss prevention technologies is recommended. Prior experience or working knowledge of ePolicy Orchestrator is also recommended.

### How to Register

This course is available for purchase at https://trellix-training.netexam.com.

Private sessions are available. For further details and pricing, please contact your Trellix account representative.

Instructor-led sessions are typically a blend of lecture and hands-on lab activities. To view our full course catalog, please visit https://trellix-training.netexam.com.

This course provides in-depth training on the tools you need to design, implement, configure, and use Trellix Data Loss Prevention Network to safeguard intellectual property and ensure compliance.

## Learning Objectives

After completing this course, learners should be able to:

- Identify Data Loss Prevention Network features, functionality, and architecture
- Install and configure Data Loss Prevention Network and ePO – On prem
- Manage user roles and permissions, policies, and rules to track and control sensitive information
- Gather and analyze evidence and events
- Create and interpret reports to monitor incidents, events, and system health

# Who Should Attend

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with network security.

# Course Outline

**Day 1:**

- Welcome
- Data Loss Prevention Solution Overview
- Data Loss Prevention Network Fundamentals
- Data Loss Prevention Network Deployment
- Prepare the Enterprise Environment
- Data Loss Prevention Network Management
- Install Data Loss Prevention Network

**Day 2:**

- Configure Users and Permission Sets
- Data Loss Prevention Policy Manager Overview
- Classify Sensitive Content
- Content Classification Criteria Rules
- DLP Data Protection Definitions
- Configure Data Protection Rules

**Day 3:**

- Data Loss Prevention Network Monitor
- Data Loss Prevention Network Discover
- Data Loss Prevention Network Discover Policy
- Data Loss Prevention Network Email Prevent
- Data Loss Prevention Network Web Prevent

**Day 4:**

- Data Loss Prevention Network Capture
- Incidents and Case Management
- Use Cases
- Dashboards and Reporting
- Upgrades and Migration
- Basic Troubleshooting
