

Network Security Administration

Instructor-Led Training

Highlights

Duration

1 day

Prerequisites

Students taking this course should have experience with network administration and support.

How to Register

Public sessions are listed at <https://trellix-training.netexam.com>.

Private sessions are available. For further details and pricing, please contact your Trellix account representative.

Instructor-led sessions are typically a blend of lecture and hands-on lab activities. To view our full course catalog, please visit <https://trellix-training.netexam.com>.

This workshop introduces a framework for administration and diagnostics of the Trellix Network Security appliance. The course includes checklists, case studies, lab challenges and guidance for transitioning difficult cases to the Trellix Support team.

Attendees will gain hands-on experience administering the appliance and diagnosing common issues.

Learning Objectives

After completing this course, learners should be able to:

- Properly deploy Network Security in the network
- Perform initial configuration of Network Security, based on system requirements and user preferences
- Administer the Network Security appliance
- Resolve issues commonly encountered with Network Security appliances
- Use logs to determine status
- Escalate issues to Trellix Support for further assistance

Who Should Attend

This course is intended for system administrators responsible for maintaining Network Security (NX) appliances.
