Customers across the Trellix Platform

86%

Finance companies in the Fortune 100

80%

Healthcare companies in the Fortune 100

3 out of 4

US Department of Defense Agencies

Your mission is unique

Stay ahead of cybercriminals and help your SecOps team respond to threats faster with the broadest, AI-powered Trellix® Security Platform. The best way to learn about our solutions is to hear from those who use them.

Trellix is a trusted cybersecurity partner across all three branches of the U.S. government, all cabinet-level agencies and all four branches of the U.S. military. State and Local agencies, as well as Education and University systems round out our robust Public Sector portfolio.

Government Certifications

DoD Impact Level 5

Trellix earns the DoD IL5 High Provisional Authorization, certifying our technology meets the rigorous standards required to secure the complex and expanding DoD cloud environment.

FedRAMP® High Authorization

Trellix GovCloud Security Platform achieved FedRAMP High Impact Level authorization making it easier for agencies to adopt an AI-powered cybersecurity platform.

“The DoD has long recognized the benefits of versatile cloud computing and the need to implement a solid security foundation built on scalable endpoint security. With Trellix EDR, the DoD has access to comprehensive and adaptive security to discover malicious activity that has evaded protection systems, from ransomware to sophisticated attackers looking to exfiltrate data or conduct espionage.”

- **Ken Kartsen, SVP and General Manager, Public Sector, Trellix**

“This milestone validates our platform’s ability to protect mission-critical data on AWS GovCloud and handle the DoD’s most sensitive unclassified information. Proud that our AI-powered EDR technology is helping safeguard national security systems.”

- **Karan Sondhi, Vice President, Chief Technology Officer, Public Sector at Trellix**

The platform CISOs trust

Build resilience, reduce risk, and protect against the latest cyber threats with the broadest AI-powered security platform.

Trellix® is a trusted cybersecurity partner across all three branches of the U.S. government, all cabinet-level agencies and all four branches of the U.S. military. State and Local agencies, as well as Education and University systems round out our robust Public Sector portfolio.

Learning & Adapting

Our Gen AI-powered security platform is built on over a decade of AI modeling and 25 years in analytics and machine learning to strengthen prevention, relieve alert fatigue, and surface stealthy threats, so you stay ahead of dynamic threats and business continues as usual.

Native & Open

Our flexible, scalable platform with open APIs integrates seamlessly with your existing technologies, strengthening your security with an ecosystem made just for you.

Expert & Embedded

Our experts monitor and research threats and campaign activities, producing insightful and actionable threat intelligence on threat actors and their behavior.
